

CARNAGE

Red Paper

**CARNAGE is an ever-evolving utility token designed to foster and encourage participation in the Get Rich or Die Trading Crypto Community and the Cryptosphere at large. At any time, CARNAGE may change its direction and goals to adapt to the swiftly changing vagaries that is Blockchain and Token related modalities. We therefore strongly advise anyone involved with CARNAGE to review this Red Paper frequently for any changes and/or updates. You should only participate in this project if you understand and accept the risky nature of emerging technology and systems.*

Carnage (CRNG) is the official utility token of the Get Rich or Die Trading Crypto Community and is a standard ERC20 token. Crowdsale and token contracts developed with POA.

Function

Carnage will allow holders to interact with smart contracts, dapps, daos, and other distributed constructs. It will also serve as a community currency (like Disney bucks, but verifiably rare) and offer discounts on community products and services such as advanced tech support, community designed swag, crypto loot crates, as well as crypto estate planning and execution. Carnage can also serve as a marker for community status and loyalty while incentivizing participation and contribution to community efforts and projects.

Crowdsale

The Carnage crowdsale contract will open at approximately 18:00 PT February 25th, 2018

The Numbers-

- 2.1 million CRNG will go to community founders and custodians

- 4.2 million will be held to facilitate Community projects, services, and exchange listings
- 2.1 million will be distributed to community participants to encourage adoption and use
- 21 million will be available through crowdsale (less than 21 million may be issued during crowdsale since tokens are only created as they are purchased)
- Hard cap of 27.4 million tokens (because tokens are generated at purchase, this number could end up lower)

Use of Funds Raised

The Numbers-

- 10% -operations and services
- 40% -crypto projects research and support initiative
- 20% -community organization and legal
- 30% -reserves

Breakdown-

- ❖ Research and Support Initiative
 - In line with our community mission of fostering a healthy cryptosphere, GRoDT will acquire crypto assets/tokens/coins/etc for testing, experimenting, and other research and may even run nodes/miners/etc in order to discover and assist worthwhile projects and networks as well as provide various forms of support to said projects and networks and their users.
 - Until there is more clarification on laws regarding cryptocurrencies and blockchain at large, all assets/tokens/coins/etc will be held by GRoDT

indefinitely. We wish to avoid any tax, securities, or other unforeseen legal pitfalls while legal definitions and regulatory framework forms and our community organization and legal research is done.

- ❖ Reserves
 - Ethereum held in reserve for the execution of smart contracts, dapps, etc, as well as future community operations and funding needs.
- ❖ Organization and Legal
 - It's important to protect our community's interests, efforts, and rights as well as those of the cryptosphere as a whole. In addition to legal counsel, GRoDT may also face unforeseen challenges in the structure or operations of our community and needs to be prepared to overcome and adapt to a rapidly evolving landscape.
- ❖ Operations and Services
 - Servers and hosting
 - Tech support
 - Presence (web, social media, etc)
 - Administration
 - Smart Contracts, dapps, daos, etc
